Measurements

CHEST

Measure with the tape positioned under your arms, the fullest part of your chest, the tape should sit across your shoulder blades. Ensure the tape is horizontal and taut.

WAIST

The tape should be positioned just below your rib cage. Ensure the tape is horizontal and taut.

HIP

With your feet locked together, wrap the tape around the fullest part of hip. Ensure the tape is horizontal and taut.

The Ventou sizing chart is based on estimates only and should therefore serve as an indication/general sizing guide only.

Your exact size requirement may be subject to your individual body structure also.

Our custom garments are hand made and therefore are subject to an Australian Standards sizing tolerance.

If you are unsure of your individual size requirements or that of your ride group, please let us know and we'll send out a sizing set (for a period of 14 Days)

for the applicable garments in which you are ordering.
